

DAS Hybrid Cable

All Your Communications and Power Under One Jacket

STRANDED COPPER

- Red and black color scheme for intuitive positive and negative wiring
- Large gauge wires for powering over long distances

SINGLE MODE FIBER

- Separately jacketed bend insensitive fiber cable minimizes the risk of damage
- Tight buffered 900 μm fiber easier to connectorize in the field

INNOVATIVE DESIGN

- Two discrete cables paired beneath an overjacket.
- Flame retardant PVC overjacket
- For Distributed Antenna Systems utilizing centralized power
- Designed for use in NEC Class 2 power limited circuits
- UL Listed CL2P Plenum

EASY TO INSTALL

- Rugged, lightweight cable
- Individually jacketed cables for separate routing and termination
- Easy to cut and connectorize
- Low bend radius makes the cable flexible and easy to handle
- Single cable pull
